

How to play Carrier Combat

Each player pieces together an aircraft carrier from the cards numbered 1-7, leaving about 36 to 48 inches between the two players aircraft carriers. Fold the airplane cards along the dotted lines to create two airplanes for each player. (Optional) Glue the interior sides of the airplanes to permanently hold them together. Players stand behind their aircraft carrier and take turns throwing their airplanes attempting to land their airplanes onto the opponents aircraft carrier. Remove any cards that an airplane lands on (note: at least half of the airplane must be on a card for it to be removed). The player that destroys their opponents aircraft carrier first wins.
